Avast Business Managed Antivirus

Deliver award-winning antivirus to all devices and manage centrally

With Avast Business Managed Antivirus, businesses can deploy award-winning endpoint protection for devices, data, and people – anywhere on the network. Remotely install antivirus on devices across multiple offices and centrally manage them from an easy-to-read dashboard to ensure all devices are always up-to-date and malware free.

Powerful cyberprotection

Our hundreds of millions of users continually feed data into our immense cloud-based machine-learning engine, helping us quickly identify and destroy threats.

Complete visibility

Deploy, configure, and manage antivirus from a centralized dashboard for complete visibility across all managed devices, whether they are onsite or remote.

Comprehensive reporting

Stay on top of your security with in-depth analyses displayed in easy-to-read reports that include threats blocked, devices without antivirus, and devices with overdue virus scans.

Multi OS Support

Endpoint Protection supports MacOS devices and Windows computers and servers.

Product Features

	Antivirus	Antivirus Pro	Antivirus Pro Plus
File Shield Scans any file that is opened or downloaded to make sure it's malware-free.	●	●	●
Web Shield Checks web URLs and certificates to ensure they're safe before a network connection is made.	●	●	●
Mail Shield Inspects both incoming and outgoing emails to ensure they are completely malware-free.	●	●	●
Behavior Shield Looks for suspicious behavior in programs installed on devices that may indicate malicious code.	●	●	●
CyberCapture Detects and analyzes suspicious files in a safe, virtual environment.	●	●	●
Firewall Monitors all network traffic between PC and the outside world to prevent unauthorized communication.	●	●	●
SmartScan Scans for malware, out-of-date patches, unsafe settings, and suspicious add-ons.	●	●	●
Sandbox Lets users run applications, download files, and visit websites in a secure, virtual environment that is isolated from the rest of the computer.	●	●	●
Wi-Fi Inspector Scans networks for vulnerabilities, checks network, device, and router settings, and identifies threats.	●	●	●
Real Site Protects against DNS (Domain Name System) hijacking to ensure the correct website is displayed.	●	●	●

Product Features

Antivirus

Antivirus
Pro

Antivirus
Pro Plus

Rescue Disk

Boots up a PC that's been infected with malware from a USB that contains a clean version of the system.

Security Browser Extension

Scans websites for reputation and authenticity, blocks ads, and puts devices in super-safe mode for additional privacy.

Remote Access Shield

Choose who can remotely access your computers and block unwanted connections to prevent Remote Desktop Protocol (RDP) exploits and brute-force attacks.

Data Shredder

Overwrites files multiple times to permanently erase sensitive data making it irretrievable.

Exchange Server Protection

Scans and filters emails at the Exchange server level – stopping potential attacks before they spread to the network.

SharePoint Server Protection

Checks all the files uploaded onto your shared storage to ensure no malware can compromise data.

Password Protection

Secures your browser stored passwords from theft.

SecureLine VPN

Encrypts your data and secures your connection when using public Wi-Fi connections, such as those in cafes or airports.
